Me ▼

My experience spans data analytics, IT, and project management, where I've worked on cross-functional initiatives, supported data-driven solutions, and contributed to innovation.

As a proud member of the Honor Society of Phi Kappa Phi, I'm deeply committed to continuous learning and service. During my time at Purdue, I lived this commitment through mentorship with SHPE, and I continue to mentor others in my free time, in addition to volunteering with underserved communities.

I'm excited to connect with thoughtful, curious people who value community, shared learning, and lifting each other up.

Experience

Research Solutions Engineering Student

Purdue's Rosen Center for Advanced Computing (RCAC)

Aug 2025 - Dec 2025 · 5 months

West Lafayette, Indiana, United States

- Developed a fully automated live migration system on an HPC cluster by integrating SLURM job scheduling with QEMU, enabling continuous virtual machine uptime through seamless node-to-node transitions and zero downtime across job cycles.
- Authored internal documentation for the recursive VM live-migration system on Purdue RCAC's GitHub and public white paper, detailing design, implementation, and operation, providing step-by-step guidance and system definitions for future users.
- Designed a multi-page Streamlit analytics dashboard for Bindley Bioscience Center's Core Facilities (Metabolomics, Imaging, and Proteomics) centralizing data management workflows and enhancing operational insight.

descriptive and predictive seed demand analytics

- Developed a CSV upload and processing pipeline that validates files, standardizes legacy formats into one cleaned dataset, and reports dropped rows
- Created interactive treemap, bar, donut, gauge, and yield-by-maturity visualizations with year and PLF filters to highlight seed trait patterns, PLF stability trends, and company performance across multiple years

Show less ^

Business Program Management Intern

Microsoft

Jun 2025 - Aug 2025 · 3 months

Redmond, Washington, United States

- Developed 9 analytics solutions to track AMERS datacenter results across safety, schedule, assets, lifecycle, and cost using Power Apps for intake, Microsoft Fabric for ETL, Kusto for storage and querying, and Power BI for reporting to enable data-driven decisions.
- Built Power Automate flows to dynamically maintain reverse lookup relationships between SharePoint Lists, automatically updating references to ensure bidirectional traceability, reducing manual effort, and improving cross-list visibility and dependency tracking.
- Created a PowerShell script using Microsoft Graph API to automate the creation of mail-enabled security groups and bulk-add 500+ users from a CSV, streamlining Outlook communication setup and reducing manual administrative overhead.

CNIT 272 Database Fundamentals Grader & Teaching Assistant

Purdue Polytechnic Institute

Jan 2024 - May 2024 · 5 months

West Lafayette, Indiana, United States

- Evaluated 100+ undergrad lab reports, assignments, quizzes, and exams; offering feedback for SQL and data modeling improvement
- Advised undergraduate students on SQL and data modeling tasks, offering problem-solving guidance
- Facilitated preparation of lectures, ensuring effective communication of course material to 100+ undergrad students

Undergraduate Research Assistant

Purdue University

Aug 2023 - May 2024 · 10 months

West Lafayette, Indiana, United States

- Authored paper analyzing stress and fatigue data from 50+ pilots/non-pilots using Multidimensional Fatigue Inventory (MFI) and Perceived Stress Scale (PSS) to present findings and improve psychological support in pilot training
- Implemented Python for data cleansing, statistical analysis, and generating data visualizations to support insights and stakeholder presentations
- Collected stress and fatigue data from student pilots/non-pilots through Qualtrics surveys, to support research on performance and safety in aviation training

Understanding Stability of Choices: Toward Robust Choice-Based Authentication in Cybersecurity

IEEE · April 20, 2026

This research paper, published by IEEE, examines how stable personal preferences can be used to strengthen authentication beyond traditional security questions, which are increasingly vulnerable to guessing, social engineering, and publicly available personal information. The study analyzes responses from 276 participants across nine choice-based questions, collected three times over two months, to evaluate both memorability and resistance to adversarial prediction. Findings show that preferences such as favorite color, number, season, day, and animal demonstrate stronger stability, making them promising candidates for more secure and user-friendly authentication methods. This research contributes to cybersecurity by identifying how choice-based questions can balance usability and security, supporting the design of robust passing sequences or password alternatives that are easier for users to remember while remaining harder for attackers to predict.

Projects

Enhancing Event Gate Operations for Purdue Athletics Using Lean Six Sigma

Jan 2025 - Apr 2025

Collaborated with a student team to optimize fan entry efficiency at Purdue's Mackey Arena using a Lean Six Sigma (DMAIC) approach. Leveraged Minitab for statistical analysis (Process Capability, SPC, ANOVA, and Pareto charts), Bizagi for business process mapping, and Python to calculate idle time between ticket scans and create visualizations to identify underutilized gates and peak congestion periods.

Key contributions included identifying crowd distribution issues through ticket scan data, analyzing wait times across gates, and proposing targeted solutions such as dynamic signage, entry incentives, and gate staffing strategies. The project resulted in actionable recommendations to reduce congestion, improve resource allocation, and enhance the overall game-day experience.

**Leveraging Transformer Models for Political Leaning Classification in U.S. News**

Jan 2025 - Apr 2025

Collaborated with a student team to apply pretrained transformer models (DeepSeek-R1 and Llama-3.2) for classifying the political leaning of U.S. news articles using the POLUSA dataset (900,000+ articles from 18 news outlets). Implemented a two-phase approach: zero-shot classification followed by fine-tuning. Evaluated model performance using accuracy, precision, recall, and F1-score. Fine-tuned models using LoRA to address hardware constraints, improving detection of left, center, and right-leaning articles. Key contributions included analyzing attention maps, comparing reasoning vs non-reasoning LLMs, and identifying the best model for real-world political bias detection.

Other creators

**Venue Management System**

Aug 2023 - Nov 2023

Developed a web app for scheduling and event management at a convention center using HTML, CSS, JavaScript, and Firebase. This system features an intuitive interface for managing bookings, reducing conflicts, and enhancing customer and employee experience.

Firebase powers real-time data handling and updates, using Firestore to store customer, venue, and reservation data. Key functionalities include live booking synchronization, quick search, data filtering, and export options, enabling efficient and error-free venue scheduling. This tool improves event planners' operational efficiency and decision-making.

Recommendations received

Brayan Perdigón

"I had the opportunity to supervise and mentor Samuel during his internship at Prospect. From day one, he showed an impressive curiosity to learn and constantly asked for new challenges, which allowed him to get involved in key areas such as player data analysis, Excel management, and growth strategies. Samuel not only learned quickly but also contributed valuable ideas and demonstrated a remarkable sense of responsibility and commitment for someone at his stage. Moreover, he stood out for his empathy and natural leadership among his peers, which makes me confident he has a bright future in any team he joins. I strongly recommend Samuel as a professional with great potential and an exemplary attitude."

Regina Moyer

"I had the pleasure of partnering with Samuel Gomez on a new internal campaign tool, and I'm deeply grateful for his collaboration. Samuel brings a rare blend of technical agility and human-centered design. He quickly understood our evolving needs, created then iterated on a campaign tool routinely with openness and precision, and consistently showed up with a positive, can-do attitude that energized the entire team. Samuel didn't just build a tool—he built trust. He took time to understand our end users and goals, proactively sought feedback, and refined use cases to ensure the tool

Messaging

Notifications

Me ▼

scales. His contributions to reporting, automation, and shareholder integration have already made a lasting impact. Whether editing campaign videos or troubleshooting access issues, Samuel consistently went above and beyond to support the team. His work ethic and collaborative spirit were recognized across the organization, and it's exciting that his work has made a permanent positive impact for us all. If you're looking for someone who combines technical excellence with genuine partnership, Samuel is that person. Additionally, Samuel is ripe for stretch projects and thoughtful data-driven projects."

**Debbie Powell**

"I had the privilege of working with Samuel Gomez during his internship at Microsoft, where we collaborated on a global initiative. Samuel quickly distinguished himself by transforming a broad concept into a scalable, automated solution that streamlined coordination, event tracking, and reporting—delivering measurable impact across international teams. He consistently demonstrated a strong learning mindset, a collaborative spirit, and a bias for action. Samuel tackled challenges with empathy and persistence, driving projects to completion while proactively supporting teammates and improving processes along the way. He's the kind of contributor who elevates a team's performance. I highly recommend him to any hiring manager seeking a reliable, resourceful, and growth-oriented team member."

**Luke Monroe**

"Samuel is a dedicated, hard worker who focuses on learning and perfecting every task put before him. He actively seeks out challenges to meet and surpass, and would be a benefit to any team he is on."

**Sebastien Hilaire**

"It is with absolute confidence and certainty that I recommend Samuel Gomez for any academic or professional opportunity he chooses to pursue. I have had the privilege of working closely with Samuel over the past few years through Fitwave and Prospect1, first as an athlete and later as an intern on our data team. In both capacities, Samuel has proven to be an exceptional individual—marked by discipline, creativity, and an uncommon level of initiative for someone so young. Samuel first joined Fitwave as one of our youngest athletes, and it didn't take long for him to distinguish himself. While many athletes show physical promise, Samuel's true strength was his mindset. He trained with intention, held himself to high standards, and quickly became a reference point for others around him. His consistency, coachability, and focus made him one of the most respected figures in our athlete community. His transition into an intern role was seamless. He joined the Prospect1 team to support our athlete data tracking efforts and quickly became essential to the process. From organizing performance metrics to identifying trends, Samuel showed strong analytical thinking and a hunger to

for problems to solve, designed solutions, and often found smarter ways of doing things before we even asked. Despite his age, Samuel carried himself with the maturity of someone far more experienced. He worked with discretion, always respected timelines, and maintained a level of professionalism that elevated the team around him. His ability to turn complex data into actionable insight helped coaches make better decisions, and his passion for learning never wavered. Samuel is a rare talent. He brings intelligence, humility, and determination into everything he does. I have no doubt he will thrive in any environment that values hard work, problem-solving, and long-term vision. If you need further information or specific feedback about Samuel's contributions, feel free to reach out directly. I recommend him without hesitation. Sincerely, Sébastien Hilaire CEO – Prospect1 / Fitwave s@prospect1.app +507 6670 9613 "

**Samuel Duprey**

"I had the pleasure of working with Sam as a TA for a project-based class that he was a student for at Purdue University. He was part of a team that developed a data application to visualize ticketing information for Purdue sports, and he stood out as a reliable and hard working contributor throughout the project. He consistently took initiative, communicated clearly, and always delivered his work on time. He did an amazing job solving technical problems using the different technologies of the project which included Dash, Python, and Pandas. Sam brought a strong work ethic and positive attitude to every part of the project. He was always on time with his work and willing to help out, which made him an amazing person to work with. He strived to learn any new technologies needed and did a great job being dependable and keeping the project on track. With his help we were able to deliver a polished data visualization application with big impacts for Purdue Athletics in the future. It was a pleasure working with him, and I'm confident he'll bring the same dedication, professionalism, and problem-solving ability to any role he takes on in the future."

**Brian Fordyce**

"I had the pleasure of working with Samuel on multiple projects this year through the Purdue Data Mine and a Six Sigma Class. His initiative and strong work ethic were always on display. Samuel brought fresh ideas and consistently delivered high-quality work on time while always collaborating productively with his teammates. I have no doubt that Samuel will achieve great things in his future endeavors."
